

GlobalMRV Vibration Dampener

Vehicle performance and emissions testing are required in all types of situations. As such, delicate, precise instrumentation for emissions testing must be balanced and protected. That's why the team at GlobalMRV created the Vibration Dampener.

This stabilization equipment provides an incredibly even and smooth ride for the PEMS equipment, while it works with each vehicle. Meanwhile, the vehicle, engine, and emissions track and do the hard work in real-time.

Constructed with sturdy aluminum framing and adjustable rubber air springs, GlobalMRV's Vibration Dampener helps professionals measure vehicle performance in some of the world's harshest terrains.

Features & Benefits of the GMRV Vibration Dampener

- **Main Uses:** The Vibration Dampener isolates sensitive instruments and equipment from vibration and/or shock.
 - Good for off-road use
